## Native Sun Offers Security and Peace of Mind with Beautiful Steel Security Doors

By Chris Shield

You can't be too careful these days. Even homes in the best neighborhoods can become victim to crime. Installing security doors is a good deterrent to the would-be home intruder. Native Sun Solar Security, LLC, located in Surprise, has exactly what you need to secure and beautify your home at the same time. Brad Jennings has been manufacturing and installing security screen doors, sunscreens, window guards, sidelight panels and gates from his Surprise location since 1985.

Brad and his staff of 10 manufacture all of their products on site and use the highest quality materials available. Native Sun's catalog offers over 60 designs ranging from a simple "plain" door to doors embellished with Saguaro's and coyotes or quail.

Brad Jennings, owner of Native Sun.

The design ideas are unlimited because you can mix and match designs from multiple styles. If you can't find a perfect design in the catalog, don't worry, they will do a custom design for you. Just bring in pictures or art work and let Brad and his team create something completely unique...just for you. And, color is no problem either. Custom color matching is available at no extra cost. Native Sun also manufactures steel window guards (with emergency release latch available), steel sidelight panels and steel gates which can be matched to any door design and color.

In addition to their steel

security door products, Native Sun provides a full line of products designed to protect your home and automobiles from the harsh Arizona sun. They install everything from sun screens to patio roll shades; and, they can even re-screen your existing screened-in patio room.

All of their steel doors carry a lifetime structural and installation guarantee. The screens are guaranteed for 5 years as are the sun screens. Native Sun is an authorized Textilene solar screen dealer and recommends the Textilene 80 and Textilene 90 solar screens which block 80% or 90% of the sun's rays.

They even sell and install a very unique sunscreen system for automobile windshields. Native Sun is the exclusive dealer for the Eclipse SunShade. Eclipse SunShade is the only self-retracting sunshade! This is an amazing product. Everyone knows we NEED a sunshade for the windshield if we don't want to burn our hands after parking our

cars in the hot sun. We also need one to prolong the life of the dash and upholstery in our cars; but what a hassle they are! Most are a pain to fold and unfold, hard to keep in place, and where do you put it when you have a car full of people? Native Sun has the answer: the Eclipse Sunshade. This unique system installs easily in any vehicle and they stay in place and do a great job. I got glowing testimonials from satisfied customers and I'm getting one installed on my car before the summer gets here for sure!

When not busy handling sales, measuring estimates and in general running his business, Brad likes to unwind by getting in a round or two of golf. He's an avid scuba diver. But this West Valley resident is also an accomplished musician and artist who enjoys painting and sculpting. And, oh yeah, he is also a member of a fairly rare breed these days...he is an Arizona native. So, Native Sun is a great name for this Native Son.

Stop by the showroom and check out the quality and beauty of Native Sun's security doors: 13071 NW Grand Ave., Surprise. Their phone number is (623) 583-8810. Showroom hours are 8-5, Monday thru Friday and 8-12 on Saturday.

Native Sun doors secure and beautify at the same time.
